

New York State Partnership for Patients (NYSPFP) is making available posters highlighting the initiatives, guidelines, and your hospital's current unit status.

These posters are laminated so hospital staff can use a dry erase marker to update the tally of days since the last event.

Following today's conference, NYSPFP will mail each hospital a copy of each of the ten posters and an order form to obtain more.

NYSPFP encourages each facility to display these posters prominently at nurses' stations and departments, and to actively engage staff in the results and drive success.
